

FFFPD GETS NEW TRUCK

Tuesday, the Frederick-Firestone Fire Protection District received its newest addition to the department: a new fire truck. In January, the fire district received notification from the Department of Local Affairs that it would be awarded a grant in the amount of \$227,000 that enabled the district to purchase a fire truck, as well as extrication equipment via funds other than tax dollars. It is yet to be determined in which station the new truck will be utilized. Fire district officials say the truck should be ready for use by late May or early June.
