June 2, 2021

Board of Directors Frederick-Firestone Fire Protection District Frederick, CO

We have audited the financial statements of the governmental activities and each major fund of Frederick-Firestone Fire Protection District for the year ended December 31, 2020. Professional standards require that we provide you with information about our responsibilities under generally accepted auditing standards, as well as certain information related to the planned scope and timing of our audit. We have communicated such information in our letter to you dated August 12, 2020. Professional standards also require that we communicate to you the following information related to our audit.

Significant Audit Matters

Qualitative Aspects of Accounting Practices

Management is responsible for the selection and use of appropriate accounting policies. The significant accounting policies used by Frederick-Firestone Fire Protection District are described in Note 1 to the financial statements. No new accounting policies were adopted and the application of existing policies was not changed during 2020. We noted no transactions entered into by Frederick-Firestone Fire Protection District during the year for which there is a lack of authoritative guidance or consensus. All significant transactions have been recognized in the financial statements in the proper period.

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. The most sensitive estimates affecting the financial statements were:

- The collectability of accounts receivable
- The estimated useful lives of capital assets, and
- The actuarial assumptions used to determine pension liabilities.

The financial statement disclosures are neutral, consistent, and clear.

Difficulties Encountered in Performing the Audit

We encountered no significant difficulties in dealing with management in performing and completing our audit.

Frederick-Firestone Fire Protection District June 2, 2021 Page 2

Corrected and Uncorrected Misstatements

Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are clearly trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements. A list of corrected misstatements is attached to the management representation letter. We are not aware of any uncorrected misstatements.

Disagreements with Management

For purposes of this letter, a disagreement with management is a financial accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Management Representations

We have requested certain representations from management that are included in the management representation letter dated June 2, 2021.

Management Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to Frederick-Firestone Fire Protection District's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Other Audit Findings or Issues

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as Frederick-Firestone Fire Protection District's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.

Current Year Comments

Internal Control

Based on the size of finance and accounting department of the District, there is limited opportunity for proper segregation of duties that would provide for an ideal system of internal control. The Board's monthly review of financial reports is a critical control to help prevent or detect and correct misstatements whether due to fraud or error. We wish to emphasize the importance of this control for a district of this size and complexity.

Financial Statement Preparation

As part of the fiscal year 2020 engagement, The Adams Group, LLC drafted the District's basic financial statements and related notes. These financial statements were reviewed by management who takes ultimate responsibility for them. While this is allowable as a non-attest service, The Adams Group, LLC cannot be a form of internal control for the District.

Frederick-Firestone Fire Protection District June 2, 2021 Page 3

Other Matters

We applied certain limited procedures to Management's Discussion & Analysis, which is required supplementary information (RSI) that supplements the basic financial statements. Our procedures consisted of inquiries of management regarding the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We did not audit the RSI and do not express an opinion or provide any assurance on the RSI.

We were engaged to report on supplementary information, which accompany the financial statements but are not RSI. With respect to this supplementary information, we made certain inquiries of management and evaluated the form, content, and methods of preparing the information to determine that the information complies with accounting principles generally accepted in the United States of America, the method of preparing it has not changed from the prior period, and the information is appropriate and complete in relation to our audit of the financial statements. We compared and reconciled the supplementary information to the underlying accounting records used to prepare the financial statements or to the financial statements themselves.

Restriction on Use

This information is intended solely for the information and use of the Board of Directors and management of Frederick-Firestone Fire Protection District and is not intended to be, and should not be, used by anyone other than these specified parties.

Sincerely,

The Adams Group, LLC Certified Public Accountants

Independent Auditors' Report

Board of Directors Frederick-Firestone Fire Protection District Frederick, Colorado

We have audited the accompanying financial statements of the governmental activities and the major fund of the Frederick-Firestone Fire Protection District (District) as of and for the year ended December 31, 2020, and the related notes to the financial statements, which collectively comprise the District's basic financial statements, as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities and the major fund of the District as of December 31, 2020, and the respective changes in financial position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other-Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, the budgetary comparison schedule, and the GASB required pension schedules as listed in the table of contents be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquires of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquires, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

The adones Sharp, LLC

June 2, 2021 Denver, Colorado

This section of the annual financial report offers readers of the Frederick-Firestone Fire Protection District (the "District") financial statements the District's discussion and analysis of its financial performance during the year ended December 31, 2020. We encourage readers to consider the information presented here in conjunction with additional information furnished in the District's financial statements, which immediately follow this section.

Background Information

The District was created in December 1975 by a number of concerned citizens about fire protection for their homes and businesses. The predominate fund approach for the District was comprised of the General Fund.

In 1980, the District's constituency approved a mill levy increase giving the District 7.750 mills to purchase Fire Station 1 and purchase equipment. On May 5, 1998, the taxpayers approved a ballot question to exempt the District from the revenue and spending limits imposed by the 1992 Colorado Constitutional Amendment, called the Taxpayers Bill of Rights (TABOR) which had reduced the District's general operations mill levy to 7.560. In November 2002, the District Board of Directors asked the taxpayers to support a \$4,045,000 bond to remodel existing stations, build a new fire station, update equipment, and purchase new fire apparatus. The voters approved the bond by an approval rate of over 65%. In May 2006, voters approved an increase in the general operations mill levy to 11.360 mills in order to provide emergency medical transport services acquired in the dissolution of Tri-Area Ambulance District on January 1, 2006 dissolving the 6.5 mill levy of the Tri-Area Ambulance District. In November of 2019, voters approved a mill levy increase to 13.900 mills to provide for the acquisition of needed personnel. The mill levy rate of 13.900 mills was in effect for taxes received in 2020.

In an effort to take advantage of historically low interest rates and pass on savings to our taxpayers, the District refinanced its 2002 General Obligation Bonds in 2011. This refinance reduced the interest rate by 50%, translating to a direct savings to taxpayers of more than \$235,000. The General Obligation Refunding Bonds, Series 2011 were issued as fully registered bonds in denominations of \$5,000, or any integral multiple thereof. The Bonds initially were registered in the name of Cede & Co., as nominee of The Depository Trust Company, New York, New York ("DTC") securities depository for the Bonds. Purchasers will not receive certificates representing their beneficial ownership interest in the Bonds. Interest on the Bonds is payable semiannually on June 1 and December 1, commencing December 1, 2011. The principal on the bonds will be payable upon surrender of the Bonds at the principal office of UMB Bank, n.a., Denver, Colorado, as Registrar and Paying Agent.

2020 Financial Highlights

• The District's financial status reflected an increase in net position during the 2020 fiscal year. The increase was \$4,152,625, a 28.2% increase when compared to beginning net position.

- Property and Specific Ownership tax revenues accounted for \$11,452,012 or 88.5% of all revenues. The District had revenue of \$618,026 from charges for services, and \$857,175 from intergovernmental, interest earnings and other revenues.
- During the year ended December 31, 2020, total governmental activities expenditures were \$8,774,588, of which, \$8,740,619 is related to fire protection and emergency services. The largest component is salaries and benefits which represents approximately 76.5% of total expenditures in 2020.
- At December 31, 2020, the District's general fund balance sheet reported an ending fund balance of \$10,149,335, an increase of \$3,902,123 from the prior year. The increase was a result of a significant increase in property tax revenue when compared to 2019.
- The District's total outstanding long-term debt (2011 bonds) decreased by \$290,000 in fiscal year 2020 as a result of scheduled principal payments on outstanding debt.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the District's basic financial statements. The basic financial statements are comprised of three components: 1) government-wide financial statements; 2) fund financial statements; and 3) notes to the financial statements. This report also contains required supplementary information in addition to the basic financial statements themselves.

Government-wide financial statements. The government-wide financial statements are designed to provide readers with a broad overview of the District's finances, in a manner similar to a private section business.

The statement of net position presents information on all of the District's assets and deferred outflows of resources and liabilities and deferred inflows of resources, with the difference between the two reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the District is improving or deteriorating.

The statement of activities presents information showing how the District's net position changed during the most recent fiscal year.

All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (such as, uncollected taxes and earned but unused vacation leave).

Both of the government-wide financial statements distinguish functions of the District that are principally supported by taxes and intergovernmental revenues (governmental activities) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges.

The District's main governmental activity is fire protection and emergency services. The basic government-wide financial statements can be found on pages 1-2 of this report.

Fund financial statements. A fund is a grouping of related accounts that are used to maintain control over resources that have been segregated for specific activities or objectives. The District, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements.

By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities. The District has one governmental fund, a general fund.

The District adopts an annual appropriated budget for the general fund, as required by State Statues. A budgetary comparison schedule has been provided for the general fund to demonstrate compliance with the budget. The basic governmental fund financial statements can be found on pages 3 - 6 of this report.

Notes to the financial statements. The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages 7-27 of this report.

Other information. In addition to the basic financial statements and accompanying notes, this report also presents certain required supplementary information.

As noted earlier, net position may serve over time as a useful indication of a government's financial position. The District's assets and deferred outflows of resources exceeded its liabilities and deferred inflows of resources by \$18,904,343 at the close of the most recent fiscal year, representing an increase in total net position for the year amounting to \$4,152,625.

Government-wide Financial Analysis

One of the largest portions of the District's net position (38.3%) reflects its investment in capital assets (for example, land, construction in progress, buildings, machinery and equipment, and vehicles); less any related debt used to acquire those assets that is still outstanding. The District uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending. Although the District's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources because the capital assets themselves cannot be used to liquidate these liabilities.

District's Net Position

		Governmental Activities		
	2020	2019		
Assets				
Current and other assets	\$ 20,214,191	\$ 17,364,918		
Capital assets	7,851,250	7,957,546		
Net pension asset	285,112			
Total assets	28,350,553	25,322,464		
Deferred outflows of resources				
Deferred charge on refunding	11,586	22,492		
Related to pension	1,951,521_	2,292,817		
Total deferred outflows of resources	1,963,107	2,315,309		
Liabilities				
Current liabilities	524,327	283,402		
Long-term liabilities	863,189	1,783,927		
Total liabilities	1,387,516	2,067,329		
Deferred inflows of resources				
Deferred property taxes	9,528,797	10,807,467		
Related to pension	493,004	11,259		
Total deferred inflows of resources	10,021,801	10,818,726		
Net position:				
Net investment in capital assets	7,245,554	7,078,980		
Restricted	657,969	627,871		
Unrestricted	11,000,820	7,044,867		
Total net position	\$ 18,904,343	\$ 14,751,718		

An additional portion of the District's net position (3.5%) represents resources that are subject to restricts on how they may be used, most of which are restrictions imposed from external sources. The remaining 58.2% of total net position (\$11,000,820), represents unrestricted net position that may be used to meet the District's ongoing obligations.

The District's finances are strong, sound, and stable because of solid, dedicated and committed financial management. The changes in net position displayed subsequently shows the governmental activities during the previous two fiscal years. The increase in net position for each year represents the extent to which expenses were less than revenues during the year.

District's Changes in Net Position

	Governmental Activities		
	2020	2019	
Revenues:			
Program revenues:			
Charges for services	\$ 618,026	\$ 630,696	
Operating grants and contributions	530,079	9,003	
General revenues:			
Property taxes and specific ownership taxes	11,452,012	6,639,914	
Investment earnings	55,813	149,327	
Other revenue	271,283	325,157	
Total revenues	12,927,213	7,754,097	
Expenses: Personnel services Professional services Commodities and supplies Education and travel Equipment maintenance	6,620,731 858,124 327,837 83,227 253,406	5,006,098 674,676 218,158 69,461 114,372	
Depreciation	597,294	480,122	
Interest on long-term debt	33,969	43,179	
Total expenses	8,774,588	6,606,066	
Change in net position	4,152,625	1,148,031	
Net position - beginning	14,751,718	13,603,687	
Net position - ending	\$ 18,904,343	\$ 14,751,718	

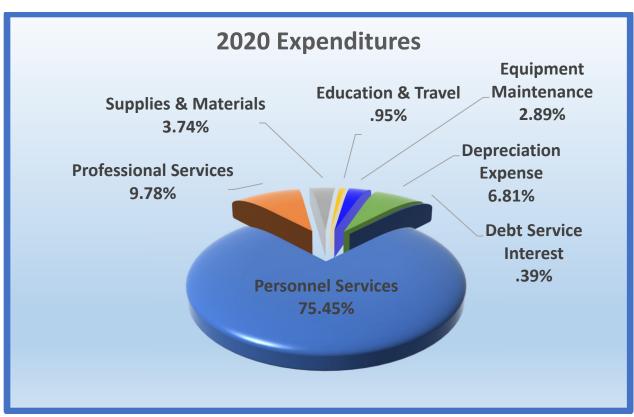

Property and specific ownership taxes account for a large portion of the District's revenue, contributing about 88.6% of total revenues as compared to 85.6% of revenues in 2019. During 2020 the District received approximately 8.9% from program revenues; in comparison to approximately 8.1% in 2019. During 2020, investment earnings constituted approximately 0.4% which was a decrease of 1.5% from 2019. Intergovernmental revenues in 2020 were 4.1% of total revenues in 2020 as compared to 0.2% in the prior year. The District expenses predominantly related to all-hazard emergency services, which includes administration, fire protection, emergency medical transport, community risk reduction, communications and vehicle and facility maintenance. Given the District is a public service organization providing full-time emergency services, the majority of the expenses are for salaries and benefits, insurance, building utilities and repairs, vehicle and equipment maintenance, training, and supplies.

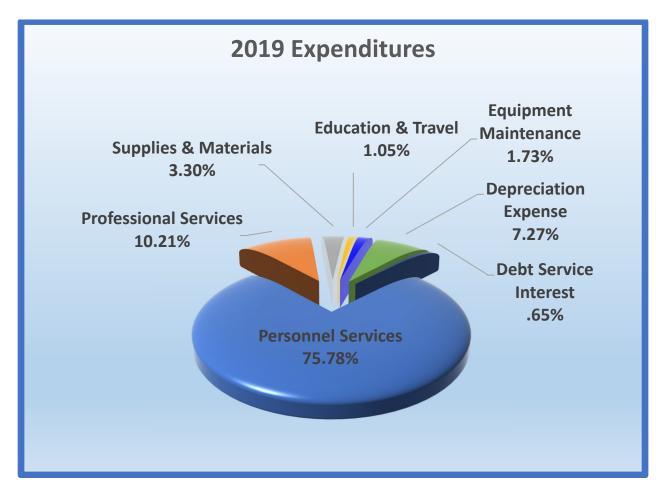

Graphic presentations of selected data from the summary tables follow to assist in the analysis of the District's activities for fiscal year 2020 and 2019.

As portrayed above and discussed earlier, the District is heavily reliant on property and specific ownership taxes. These tax revenues account for 89% of total revenues.

Total expenses for governmental activities was \$8,774,588 in 2020 when compared to the 2019 balance of \$6,606,066. The largest increase was related to personnel services which saw an increase in 2020 of \$1,484,931. The other large increases when comparing 2020 to 2019 were a result of increases in professional services and equipment maintenance in the amounts of \$183,448 and \$138,975, respectively.

Financial Analysis of the General Fund

The General Fund was established and is continually funded to provide for the daily activities, salaries, expenses, and operating costs of the District. This fund provides for functional areas of the organization - administration, firefighting, EMS transport, fire prevention, training, communications, vehicle maintenance, and facility maintenance. The general fund also provides for such other items as insurance, utilities, fees, and other operating costs the District incurs. The primary funding source for the general fund is taxation of real property. Other sources of income for the general fund include emergency medical transport services and code enforcement fees, interest income, and other income.

As of December 31, 2020, the District's general fund reported an ending fund balance of \$10,149,335, an increase of \$3,902,123 from the prior year. There is \$2,270,223 of unassigned fund balance, which is available for spending at the District's discretion. In addition, the District has assigned \$7,506,255 for specific purposes as of December 31, 2020.

General Fund Budgetary Highlights

A budget to actual statement is provided for the general fund. Budgeted taxes represent the full levy of property taxes for the year, whereas actual results reflect a small number of delinquent accounts. There were positive revenue variances totaling \$954,811. Expenditures for the District were under budget by a total of \$1,332,115 due mostly to conservative budgeting and less actual capital outlay in 2020 than originally budgeted.

The District must maintain a 3% emergency contingency restricted reserve account as a part of the TABOR Amendment (Taxpayer Bill of Rights). At December 31, 2020, the District's TABOR reserve amounted to \$372,857.

Capital Assets and Debt Administration

Capital Assets

At the end of 2020, the District had capital assets of \$13,395,060 (before depreciation) in a broad range of capital assets, including land, buildings, site improvements, vehicles, and other equipment. As outlined below, capital assets decreased \$106,296 in 2020 as a result of current year disposals and current year depreciation expense Additional information on the District's capital assets can be found in Note 3 to the financial statements. Total depreciation expense for the year was \$597,294.

Capital Assets (Net of Accumulated Depreciation)

	Governmental Activities				
	2020 2019				
Land	\$	634,262	\$	634,262	
Construction in progress		13,910		73,813	
Buildings		5,268,875		5,297,099	
Machinery and equipment		633,965		595,944	
Vehicles		1,300,238		1,356,428	
	\$	7,851,250	\$	7,957,546	

Long-Term Debt

At December 31, 2020, the District had \$600,000 in general obligation bonds, as shown below. More detailed information about the District's long-term liabilities is presented in Note 4 to the financial statements. The District did not issue any new debt during 2020. Colorado Revised Statute 32-1-1101(6)(a) states that a Fire District shall have a limit of bonded indebtedness determined by a specific formula. The District's outstanding debt is below this limit.

Outstanding Long-Term Debt

	Governmental		
	 Activities		
	 2020		2019
Bonds payable	\$ 600,000	\$	890,000

Factors Bearing on the District's Future

At the time these financial statements were prepared and audited, the District was aware of the following circumstances relating to the 2021 budget year and other factors that could affect the District's financial situation:

- The gross assessed value for the 2021 budget year (all property in the District's boundaries) increased to \$738,544,580 when compared to budget year 2020 figure of \$729,591,314. Estimated general operating property tax revenue for 2021 is \$9,208,807.
- The District continues to experience significant growth in residential development within District boundaries.
- The District continues to hire new personnel and has a projected budget for wages and salaries in 2021 of \$6,049,833 compared to a 2020 budgeted amount of \$5,692,316.

The District is not aware of any other facts, decisions, or conditions that are expected to have a significant effect on the District's financial position or results of operations.

Contacting the District's Financial Management Team

This financial report is designed to provide the District's citizens, taxpayers, investors, and creditors with a general overview of the District's finances and to demonstrate the District's accountability for the money it receives. If you have questions about this report or need additional financial information, contact the Frederick-Firestone Fire Protection District at 8426 Kosmerl Place, Frederick 80504-5444, or P.O. Box 129, Frederick, Colorado 80530; telephone 303-833-2742 or fax 303-833-3736. Please direct all questions or requests to Finance Director Mike Cummins or Fire Chief Jeremy A. Young.

FREDERICK-FIRESTONE FIRE PROTECTION DISTRICT RECONCILIATION OF THE GOVERNMENTAL FUND STATEMENT OF REVENUE, EXPENDITURES, AND CHANGES IN FUND BALANCE TO THE STATEMENT OF ACTIVITIES YEAR ENDED DECEMBER 31, 2020

Net change in fund balance - total governmental fund:

\$ 3,902,123

Amounts reported for governmental activities in the statement of activities are different because:

Capital outlays to purchase or construct capital assets are reported in governmental fund as expenditures. However, for governmental activities those costs are capitalized in the statement of net position and are allocated over their estimated useful lives as annual depreciation expense in the statement of activities.

Capital outlay	490,998
Depreciation expense	(597,294)

The issuance of long-term debt provides current financial resources to fund, while the repayment of the principal of long-term debt consumes the current financial resources of governmental fund. Neither transaction, however, has any effect on net position.

Principal payments 290,000

Governmental fund report the effect of premiums, discounts, and similar items when debt is first issued, were as these amounts are deferred and amortized in the statement of activities.

Amortization of bond premium	5,362
Amortization of loss on refunding	(10,906)

Some expenses in the statement of activities do not require the use of current financial resources and are, therefore, not reported as expenditures in the governmental fund.

Change in accrued interest	725
Change in compensated absences	(9,265)

Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the governmental fund.

Emergency medical services (15,830)

Some items reported in the statement of activities do not require the use of current financial resources and, therefore, are not reported as expenditures in the governmental fund. The (increases) decreases in these activities consist of:

Pension income 96,712

Change in net position of governmental activities

\$ 4,152,625

NOTE 1 – <u>SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES</u>

Reporting Entity

The Frederick-Firestone Fire Protection District (District) is an independent local governmental unit organized under the laws of the State of Colorado and governed by an elected five-member Board of Directors (Board) to provide fire protection and emergency medical services within the boundaries of the District in Weld County, Colorado. The Department was formed in 1915 and the District was formed in 1976.

The accounting policies of the District conform to generally accepted accounting principles as applicable to governmental entities. The following is a summary of the more significant policies.

The definition of the reporting entity is based primarily on financial accountability. The District is financially accountable for organizations that make up its legal entity. It is also financially accountable for legally separate organizations if the District officials appoint a voting majority of the organization's governing body and either it is able to impose its will on that organization or there is a potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the District. The District may also be financially accountable for organizations that are fiscally dependent upon it. As required by generally accepted governmental accounting principles, the financial statements of the reporting entity include those of the District (the primary government) which has no component units. The District does not exercise oversight responsibility over any other entity, nor is the District a component of any other governmental entity.

Government-wide and fund financial statements

The government-wide financial statements (i.e., statement of net position and the statement of activities). These financial statements include all of the activities of the District. Governmental activities are normally supported by taxes and emergency medical service revenue.

The statement of net position reports all financial and capital resources of the District. The difference between the assets, deferred outflows of resources, liabilities, and deferred inflows of resources of the District is reported as net position.

The statement of activities demonstrates the degree to which the direct and indirect expenses of a given function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include charges to customers or applicants who purchase, use, or directly benefit from goods, services or privileges provided by a given function or segment. Taxes and other items not properly included amount program revenues are reported instead as general revenues.

NOTE 1 – <u>SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)</u>

Measurement focus, basis of accounting, and financial statement presentation

The government-wide financial statements are reported using the *economic resources* measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Depreciation is computed and recorded as an operating expense.

Expenditures for property and equipment are shown as increases in assets. Employer and plan member contributions are recognized in the period that contributions are due.

The governmental fund financial statements are reported using the *current financial* resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the District considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. The major sources of revenue susceptible to accrual are property tax and emergency medical service fees. Expenditures, other than interest on long-term obligations are recorded when the liability is incurred or when the long-term obligations is paid. All other revenue items are considered to be measurable and available only when cash is received by the District.

The District reports the following major governmental fund:

<u>General Fund</u> – The general fund is used to account for all financial resources of the District except those required to be accounted for in another fund. The general fund balance is available to the District for any purpose provided it is expended or transferred according to the general laws of Colorado and the District's policies.

Assets, Deferred Outflows of Resources, Liabilities, Deferred Inflows of Resources, and Net Position/Fund Balances

Cash and Investments – Cash equivalents are defined as investments with original maturities of three months or less. Investments are stated at net asset value.

Receivables – All receivables are reported at their gross values and, where appropriate, are reduced by the estimated portion that is expected to be uncollectible. At December 31, 2020, management has recorded an allowance of \$129,525 for contractual allowances and uncollectible ambulance service fees. All receivables are expected to be collected within one year.

NOTE 1 – <u>SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)</u>

Assets, Deferred Outflows of Resources, Liabilities, Deferred Inflows of Resources, and Net Position/Fund Balances (Continued)

Capital Assets – Capital assets, which include land, construction in progress, buildings and improvements, machinery and equipment, and vehicles are reported in the government-wide financial statements. Capital assets are defined by the District as assets with an initial, individual cost of more than \$5,000 and an estimated useful life in excess of one year. Such assets are recorded at acquisition cost or estimated acquisition cost if purchased or constructed. Donated capital assets are recorded at their estimated acquisition cost at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized. Capital assets of the District are depreciated using the straight-line method over the following estimated useful lives.

Buildings and improvements	10 - 50 years
Machinery and equipment	5 - 15 years
Vehicles	7 - 20 years

Compensated Absences – Employees of the District are allowed to accumulate unused vacation and sick time. Upon separation from employment with the District, an employee will be compensated for accrued vacation time, up to the employee's maximum, at their current rate of pay. Accrued sick time is not paid to the employee upon separation. Accumulated unpaid vacation pay is accrued when earned in the government-wide financial statements. A liability is reported in the governmental fund financial statements when payment is due. The District's general fund is used to liquidate compensated absences of the governmental activities.

Long-Term Debt – In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as current expenditures.

Deferred Outflows/Inflows of Resources – In addition to assets, the statement of net position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/ expenditure) until then.

NOTE 1 – <u>SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)</u>

Assets, Deferred Outflows of Resources, Liabilities, Deferred Inflows of Resources, and Net Position/Fund Balances (Continued)

Deferred outflows of resources include the deferred charge on 2002 Series Bond refunding and certain amounts related to the District's defined benefit pension plans which are to be amortized and recognized as revenue/expense in future periods.

In addition to liabilities, the statement of financial position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, *deferred inflows of resources*, represents an acquisition of net position that applies to a future period(s) and so will *not* be recognized as an inflow of resources (revenue) until that time. Deferred inflows of resources include property taxes earned but levied for a subsequent period and certain amounts related to the District's defined benefit pension plans which are to be amortized and recognized as revenue/expense in future periods.

Fund Balances – The District reports fund balances in the governmental fund in accordance with Governmental Accounting Standards Board (GASB) Statement No. 54, Fund Balance Reporting and Governmental Fund Type Definitions. This Statement defined the different types of fund balances that a governmental entity must use for financial reporting. As of December 31, 2020, fund balance of the governmental fund is classified as follows:

Nonspendable — Amounts that cannot be spent either because they are in nonspendable form (i.e. inventories or prepaid items) or because they are legally or contractually required to be maintained intact. At December 31, 2020, the District had no amounts classified as nonspendable fund balance.

Restricted – Amounts that can be spent only for specific purposes because of constitutional provisions, enabling legislation, constraints that are externally imposed by creditors, grantors, contributors, or the laws or regulations of other governments. At December 31, 2020, the District has \$372,857 restricted for emergencies.

Committed – Amounts that can be used only for specific purposes determined by a formal action of District's Board of Directors (Board). The Board is the highest level of decision-making body for the District. Commitments may be established, modified, or rescinded only through ordinances or resolutions approved by the Board. At December 31, 2020, the District had no amounts classified as committed fund balance.

NOTE 1 – <u>SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)</u>

Assets, Deferred Outflows of Resources, Liabilities, Deferred Inflows of Resources, and Net Position/Fund Balances (Continued)

Assigned – Amounts that are subject to a purpose constraint that represents an intended use established by the District in its budget process. The purpose of the assignment must be narrower than the purpose of the general fund. At December 31, 2020, the District has assigned funds for an operational contingency of \$2,069,038, an equipment cost recovery of \$2,383,304, a facility cost recovery of \$2,733,650, and debt service of \$320,263. The District's goal is to have a combination of 25% of the operating budget in the reserve for emergencies and the operational contingency.

Unassigned – Represents the residual classification for the District's general fund and could report a surplus or deficit.

When an expenditure is incurred for purposes for which both restricted and unrestricted fund balance is available, the District considers restricted funds to have been spent first.

When an expenditure is incurred for which committed, assigned, or unassigned fund balances are available, the District considers amounts to have been spent first out of committed funds, then assigned funds, and finally unassigned funds, as needed, unless the Board has provided otherwise in its commitment or assignment actions.

Property taxes

Property taxes are levied by the District board of directors. The levy is based on assessed valuations determined by the County Assessors generally as of January 1 of each year. The levy is normally set by December 15 by certification to the County Commissioners to put the tax lien on the individual properties as of January 1 of the following year.

The County Treasurers collect the determined taxes during the ensuing calendar year. The taxes are payable by April or if in equal installments, at the taxpayer's election, in February and June. Delinquent taxpayers are notified in August and generally, sales of the tax liens on delinquent properties are held in November or December. The County Treasurers remit the taxes collected monthly to the District.

Property taxes, net of estimated uncollectible taxes, are recorded initially as a deferred inflow in the year they are levied and measurable. The deferred inflow property tax revenues are recorded as revenue in the year they are available or collected.

NOTE 1 – <u>SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)</u>

Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Actual results could differ from those estimates.

Budgets

In accordance with the Colorado Budget Law, the Board holds public hearings in the fall of each year to approve the budget and appropriate the funds for the ensuing year. The Board can modify the budget and appropriation resolutions upon completion of notification and publication requirements. The appropriation is at the total fund expenditures level and lapses at year end. A budget is legally adopted for the General Fund on a basis consistent with U.S. generally accepted accounting principles. Prior to December 31, the budget is legally enacted through passage of a resolution.

District management is authorized to transfer budgeted amounts between departments within any fund. However, any revisions that alter the total expenditures of the general fund must be approved by the Board.

Tax, spending, and debt limitations

Colorado voters passed an amendment to the State Constitution, Article X, Section 20, (TABOR) which has several limitations, including revenue increases, spending abilities, and other specific requirements of state and local government.

In 1998, the District's voters exempted the District from the revenue and spending limits imposed by TABOR. As a result, the District is permitted to retain and expend all revenues from all sources and including ad valorem property taxes. The District's mill levy shall not be increased without voter approval. TABOR is complex and subject to judicial interpretation. The District believes it is in compliance with the requirements of TABOR. However, the District has made certain interpretations of TABOR's language in order to determine its compliance. TABOR requires local governments to establish Emergency Reserves. These reserves must be at least 3% of fiscal year spending (excluding bonded debt service). For the year ending December 31, 2020, the District has restricted \$372,857 for this purpose.

NOTE 2 – CASH AND INVESTMENTS

A summary of deposits and investments at December 31, 2020, follows:

Cash Deposits	\$ 1,549,181
Cash with County Treasurer	41,732
Investments	8,797,098
Total cash and investments	\$ 10,388,011

Deposits

The Colorado Public Deposit Protection Act (PDPA) requires all units of local government deposit cash in eligible public depositories. Eligibility is determined by state regulations. Amounts on deposit in excess of federal insurance levels must be collateralized by eligible collateral as determined by the PDPA. PDPA allows the financial institution to create a single collateral pool for all public funds held.

The pool is to be maintained by another institution or held in trust for all the uninsured public deposits as a group. The market value of the collateral must be at least equal to 102% of the uninsured deposits.

At December 31, 2020, the bank balance and carrying amount of the District's deposits were \$1,568,160 and \$1,549,181, respectively. All cash deposits were covered by either the FDIC or PDPA.

Investments

The District's investment policy follows state statutes regarding investments. Colorado Statutes specify investment instruments meeting defined rating and risk criteria in which local governments may invest which include:

- Obligations of the United States, certain U.S. government agency securities of the Work Bank
- General obligation and revenue bonds of U.S. local government entities
- Bankers' acceptances of certain banks
- Commercial paper
- Written repurchase agreements collateralized by certain authorized securities
- Certain money market funds
- Guaranteed investment contracts
- Local government investment pools
- Certain reverse repurchase agreements
- Certain certificates of participation
- Certain securities lending transactions

NOTE 2 – CASH AND INVESTMENTS (CONTINUED)

Interest Rate Risk – The District's investment policy as it references Colorado Statutes requires that no investment may have a maturity in excess of five years from the date of purchase.

Concentration of Credit Risk - The District places no limit on the amount that may be invested in any one issuer. However, the District's investment policy indicates that its concentration of investments will be in local government investment pools.

The District invests funds in the Colorado Local Government Liquid Asset Trust ("COLOTRUST"). COLOTRUST is an investment vehicle established for local government entities in Colorado to pool surplus funds. The State Securities Commissioner administers and enforces all State statutes governing the Trust. The Trust operates similarly to a money market fund and each share is equal in value to \$1.00. The Trust offers shares in two portfolios, COLOTRUST PRIME and COLOTRUST PLUS+. Both portfolios may invest in U.S. Treasury securities and repurchase agreements collateralized by U.S. Treasury securities. COLOTRUST PLUS+ may also invest in certain obligations of U.S. government agencies, highest rated commercial paper and repurchase agreements collateralized by certain obligations of U.S. government agencies. A designated custodial bank serves as custodian for the Trust's portfolios pursuant to a custodian agreement. The custodian acts as safekeeping agent for the Trust's investment portfolios and provides services as the depository in connection with direct investments and withdrawals. The custodian's internal records segregate investments owned by the Trust. COLOTRUST places no restrictions or limitations on withdrawals. COLOTRUST is rated AAAm by Standards & Poor's and is measured at net asset value (NAV) by the District. There are no unfunded commitments, the redemption frequency is daily and there is no redemption notice period.

As of December 31, 2020, the District had \$8,797,098 investments in COLOTRUST PLUS.

NOTE 3 – <u>CAPITAL ASSETS</u>

The following is a summary of changes in governmental activities capital assets during the year ended December 31, 2020:

	Balances			Balances	
	December, 31			December, 31	
	2019	Additions	Deletions	2020	
Governmental Activities:					
Capital Assets,					
not being depreciated					
Land	\$ 634,262	\$ -	\$ -	\$ 634,262

<i>U</i> 1 ,				,,	
Government Capital Assets	\$ 7,957,546	\$ (32,483)	\$ 73,813	\$ 7,851,250	

Depreciation expense of \$597,294 was charged to fire protection and emergency services for the year ended December 31, 2020.

NOTE 4 – <u>LONG-TERM DEBT</u>

The following is a summary of long-term debt transactions for the governmental activities of the District for the year ended December 31, 2020:

Balances				Balances							
	De	cember 31,					Dec	ember 31,		Due In	
	2019		A	Additions		Deletions		2020		One Year	
2011 Refunding bonds	\$	890,000	\$	-	\$	290,000	\$	600,000	\$	300,000	
2011 Bond premium		11,058		-		5,362		5,696		3,751	
Compensated absences		124,619		328,211		318,946		133,884		44,628	
Total	\$	1,025,677	\$	328,211	\$	614,308	\$	739,580	\$	348,379	

2011 Refunding Bonds

The District issued 2011 Refunding Bonds (the 2011 Bonds), dated October 20, 2011. The net proceeds of \$2,960,000, along with funds from the District, were used to: (i) refund, on an advance refunding basis, all of the District's outstanding General Obligation Bonds, Series 2002, outstanding in an amount of \$3,055,000 (the refunded bonds); and (ii) pay the costs of issuance of the bonds (collectively, the "Refunding Project"). The proceeds were deposited into an irrevocable trust with an escrow agent to provide future debt service payments on the refunded bonds. As a result, the refundable bonds are considered defeased, and the related liability for the bonds has been removed from the District's liabilities.

For the Series 2011 bonds, principal and interest payments are due semiannually on June 1 and December 1, through 2023. Interest accrues at rates ranging from 2.00% to 3.50%. The 2011 Bonds are secured by a pledge of the general ad valorem property taxes of the District in an amount necessary to service the debt when due. The Bonds are not subject to redemption prior to maturity.

ear ended						
cember 31,	F	rincipal	I	nterest		Total
2021	\$	300,000	\$	20,250	\$	320,250

NOTE 5 – RISK MANAGEMENT

The District is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. The District maintains insurance through a commercial carrier for these risks of loss. Settled claims have not exceeded insured amounts in the last three years.

NOTE 6 – <u>VOLUNTEERS' PENSION FUND</u>

Plan Description

The District, on behalf of its volunteer firefighters, contributes to a defined benefit pension plan which is administered by FPPA. Assets of the plan are commingled for investment purposes in the Fire and Police member's Benefit Fund, an agent multiple-employer defined benefit pension plan administered by FPPA. The plan provides retirement benefits for members and beneficiaries according to the plan provisions as enacted and governed by the pension fund board of trustees. Colorado Revised Statutes (CRS), as amended, establishes basic benefit provisions under the plan.

FPPA issues a publicly available annual financial report that includes the assets of the volunteer plan. That report may be obtained by calling FPPA at 303-770-3772. Volunteer firefighters who complete the minimum annual training required by the District and are members in good standing of the volunteer organization, are eligible to participate in the plan for that year. Volunteers' rights to a benefit vest after ten years of service. Volunteers who retire at, or after the age of 50, with twenty years of credited service are entitled to benefit. Volunteers who retire with ten years of credited service are entitled to a partial benefit. Surviving spouses are entitled to a 50% benefit. In addition, the plan provides death and disability benefits funded by insurance policies.

At December 31, 2020, the following members were covered by the benefit terms:

Retirees and Beneficiaries	14
Total	14

Benefits Provided

The Plan provides retirement, survivor, death, and funeral benefits. Retirement benefit for a member is \$200 a month for 20 or more years of service. Those members with a minimum of 10 years of service receive \$10 per month for every year of services.

Survivor's death benefits range from \$100 monthly benefit payment to 50% of normal benefit depending on different variables. Funeral benefit to the family members is a one-time payment of \$100.

NOTE 6 – VOLUNTEERS' PENSION FUND (CONTINUED)

Contributions

Contributions are determined by the FPPA actuary, using the entry age normal cost method as of January 1, 2019. Contributions into the pension fund are derived from two sources; contributions directly from the District and contributions from the State based on assessed property values and other formulas. For the year ended December 31, 2020, the District's contributions were \$20,006.

<u>Pension Liability, Pension Expense, and Deferred Outflows of Resources and Deferred</u> Inflows of Resources Related to Pensions

At December 31, 2020, the District reported a net pension liability of \$123,609. The net pension liability was measured at December 31, 2019 and was determined by an actuarial valuation as of January 1, 2019. Standard update procedures were used to roll forward the total pension liability to December 31, 2020.

For the year ended December 31, 2020, the District recognized pension income of \$5,188. At December 31, 2020, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources.

	D	eferred	De	Deferred			
	Out	tflows of	Inf	Inflows of			
	Re	sources	Resources				
Net Difference between Projected and Actual							
Earnings on Pension Plan Investments	\$	-	\$	2,779			
Contributions Subsequent to the Measurement Date		20,006		-			
Total	\$	20,006	\$	2,779			

\$20,006 reported as deferred outflows of resources related to pensions, resulting from contributions subsequent to the measurement date, will be recognized as a reduction of the net pension liability in the year ended December 31, 2021. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year Ended December 31,	Amount		
2021	\$	(522)	
2022		(1,181)	
2023		323	
2024		(1,399)	
Total	\$	(2,779)	

NOTE 6 – <u>VOLUNTEERS' PENSION FUND (CONTINUED)</u>

Actuarial Assumptions

The total pension liability in the January 1, 2019 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurements:

Actuarial Cost Method Entry Age Normal
Amortization Method Level Dollar, Open*

Remaining Amortization Period 11 years*

Asset Valuation Method 5-Year smoothed fair value

Inflation 2.50% Salary Increases N/A
Investment Rate of Return 7.00%

Retirement Age 50% per year of eligibility until 100% at age 65

Mortality rates were based on the following:

- **Pre-retirement:** 2006 central rates from the RP-2014 Employee Mortality Tables for males and females projected to 2018 using the MP-2017 projection scales, and then projected prospectively using the ultimate rates of the scale for all years, 50% multiplier for off-duty mortality.
- **Post-retirement:** 2006 central rates from the RP-2014 Annuitant Mortality Tables for males and females projected to 2018 using the MP-2017 projection scales, and then projected prospectively using the ultimate rates of the scale for all years.
- **Disabled:** 2006 central rates from the RP-2014 Disabled Mortality Tables for males and females projected to 2018 using the MP-2017 projection scales, and then projected prospectively using the ultimate rates of the scale for all years.

Projected benefit payments are required to be discounted to their actuarial present values using a Single Discount Rate that reflects (1) a long-term expected rate of return on pension plan investments (to the extent that the plan's fiduciary net position is projected to be sufficient to pay benefits) and (2) tax-exempt municipal bond rate based on an index of 20-year general obligation bonds with an average AA credit rating as of the measurement date (to the extent that the plan's projected fiduciary net position is not sufficient to pay benefits). Being that the plan's fiduciary net position is projected to be sufficient to pay benefits, the long-term expected rate of return of 7.00% was used as the discount rate.

^{*}Plans that are heavily weighted with retiree liabilities use an amortization period based on the expected remaining lifetime of the participants.

NOTE 6 – <u>VOLUNTEERS' PENSION FUND (CONTINUED)</u>

Actuarial Assumptions (continued)

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class.

These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic nominal rates of return for each major asset class included in the Fund's target asset allocation as of December 31, 2019 are summarized in the following table:

		Long-Term
		Expected Nominal
Asset Class	Target Allocation	Rate of Return
Cash	2.00%	2.52%
Fixed Income	15.00%	5.20%
Managed Futures	4.00%	5.00%
Absolute Return	8.00%	5.50%
Long Short	8.00%	6.00%
Global Equity	38.00%	7.00%
Private Markets	25.00%	9.20%
Total	100.00%	

The discount rate used to measure the total pension liability was 7.00 percent. The projection of cash flows used to determine the discount rate assumed that contributions from participating employers will be made based on the actuarially determined rates based on the Board's funding policy, which establishes the contractually required rates under Colorado statutes. Based on those assumptions, the Volunteer Plan fiduciary net position was projected to be available to make all the projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payment) to determine the total pension liability.

NOTE 6 – <u>VOLUNTEERS' PENSION FUND (CONTINUED)</u>

Sensitivity of the Net Pension Liability to Changes in the Discount Rate

The following presents the net pension asset calculated using the discount rate of 7.00 percent, as well as the net pension asset would be if it were calculated using a discount rate that is 1-percentage-point lower (6.00 percent) or 1- percentage-point higher (8.00 percent) than the current rate:

				Current				
	1%	1% Decrease		count Rate	1% Increase			
	(6.00%)		((7.00%)	(8.00%)			
Proportionate Share of the								
Net Pension Liability	\$	138,994	\$	123,609	\$	110,075		

The Fire & Police Pension Association administers an agent multiple-employer Public Employee Retirement System (PERS). The PERS represents the assets of numerous separate plans that have been pooled for investment purposes. The pension plans have elected to affiliate with FPPA for plan administration and investment only. FPPA issues a publicly available comprehensive annual financial report that can be obtained at http://www.fppaco.org.

NOTE 7 – STATEWIDE DEFINED BENEFIT PLAN

Plan Description

The District contributes to the Statewide Defined Benefit Plan, a cost-sharing multiple-employer defined benefit pension plan. The plan is administered by the Fire and Police Pension Association of Colorado (FPPA). The Plan provides retirement benefits for members and beneficiaries. Death and disability coverage is provided for members hired prior to January 1, 1997 through the Plan. All full-time, paid police officers of the Town are members of the Statewide Defined Benefit Plan.

Colorado statutes assign the authority to establish benefit provisions to the state legislature. FPPA issues a publicly available annual financial report that includes financial statements and requires supplementary information for both the SWDB and the Statewide Death and Disability Plan. FPPA issues a publicly available financial report that includes information on the plan. That report may be obtained at www.fppaco.org.

Benefits Provided

A plan member is eligible for a normal retirement pension once the member has completed twenty-five years of credited service and has attained the age of 55. Effective January 1, 2021, a member may also qualify for a normal retirement pension if the member's combined years of service and age equals at least 80, with a minimum age of 50 (Rule of 80).

The annual normal retirement benefit is 2 percent of the average of the member's highest three years' pensionable earnings for each year of credited service up to ten years, plus 2.5 percent for each year of service thereafter. The benefit earned prior to January 1, 2007 for members of affiliated Social Security employers will be reduced by the amount of Social Security income payable to the member annually. Effective January 1, 2007, members covered under Statewide Defined Benefit Social Security Component will receive half the benefit when compared to the Statewide Defined Benefit Plan. Benefit adjustments paid to retired members are evaluated annually and may be re-determined every October 1. The amount of any increase is based on the Board's discretion and can range from 0 to the higher of 3 percent or the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W).

A member is eligible for an early retirement after completion of 30 years of service or attainment of age 50 with at least five years of credited service. The early retirement benefit equals the normal retirement benefit reduced on an actuarially equivalent basis. Upon termination, an employee may elect to have member contributions, along with 5 percent as interest, returned as a lump sum distribution.

NOTE 7 – <u>STATEWIDE DEFINED BENEFIT PLAN (CONTINUED)</u>

Benefits Provided (continued)

Alternatively, a member with at least five years of accredited service may leave contributions with the Plan and remain eligible for a retirement pension at age 55 equal to 2 percent of the member's average highest three years' pensionable earnings for each year of credited service up to ten years, plus 2.5 percent for each year of service thereafter.

Contributions

The District and eligible employees are required to contribute to the plan at rates established by State statutes. Employer contributions rates can only be amended by state statute. Member contribution rates can be amended by state statute or election of the membership. Effective January 1, 2021, contribution rates for employers and members may be increased equally by the FPPA Board of Directors upon approval through an election by both the employers and members.

Members of the SWDB plan and their employers contributed at a rate of 11% and 8%, respectively, of base salary for a total contribution rate of 19% in 2020. In 2014, the members elected to increase the member contribution rate to the SWDB plan beginning in 2015. Member contribution rates will increase 0.5% annually through 2022 to a total of 12% of pensionable earnings. Employer contributions are 8% in 2020. Employer contributions will increase 0.5% annually beginning in 2021 through 2030 to a total of 13% of pensionable earnings. The District's contributions to the plan of the year ended December 31, 2020, were \$369,941, equal to the required contributions.

<u>Pension Asset, Pension Expense, and Deferred Outflows of Resources and Deferred</u> Inflows of Resources Related to Pension

At December 31, 2020, the District reported a net pension asset of \$285,112, representing its proportionate share of the net pension asset of the plan. The net pension asset was measured at December 31, 2019, and the total pension liability used to calculate the net pension asset was determined by an actuarial valuation as of January 1, 2020. The District's proportion of the net pension asset was based on the District's share of contributions to the pension plan relative to the contributions of all participating entities. At December 31, 2019, the District's proportion was 0.50412% which was an increase of 0.00467% from its proportion measured at December 31, 2018.

For the year ended December 31, 2020, the District recognized pension income of \$18,838. At December 31, 2020, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

NOTE 7 – <u>STATEWIDE DEFINED BENEFIT PLAN (CONTINUED)</u>

<u>Pension Asset, Pension Expense, and Deferred Outflows of Resources and Deferred</u> Inflows of Resources Related to Pension (continued)

	Deferred		Deferred		
	Outflows of		In	flows of	
	R	Resources	Re	esources	
Difference between Expected and Actual Experience	\$	964,873	\$	5,581	
Changes of Assumptions or other Inputs		541,368		-	
Net Difference between Projected and Actual					
Earnings on Pension Plan Investments		-		448,204	
Changes in Proportion and Differences between					
Contributions Recognized and Proportionate Share					
of Contributions		55,333		36,440	
Contributions Subsequent to the Measurement Date		369,941		_	
Total	\$	1,931,515	\$	490,225	

\$369,941 reported as deferred outflows of resources related to pension resulting from District contributions subsequent to the measurement date will be recognized as an increase in the net pension asset in the year ended December 31, 2021. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized as pension expense as follows:

Year Ended December 31,	Amount		
2021	\$	103,021	
2022		64,206	
2023		210,016	
2024		20,889	
2025		212,504	
Thereafter		460,713	
Total	\$	1,071,349	

Actuarial Assumptions

The actuarial valuations as of January 1, 2020, determined the total pension liability using the following actuarial assumptions and other inputs:

NOTE 7 – <u>STATEWIDE DEFINED BENEFIT PLAN (CONTINUED)</u>

Actuarial Assumptions (continued)

	Total	Actuarial Determined
	Pension Liability	Contributions
Actuarial Valuation Date	January 1, 2020	January 1, 2019
Actuarial Method	Entry Age Normal	Entry Age Normal
		Level % of Payroll,
Amortization Method	N/A	Open
Amortization Period	N/A	30 years
Long-term Investment Rate of Return*	7.0%	7.0%
Projected Salary Increases	4.25% - 11.25%	4.25% - 11.25%
Cost of Living Adjustments (COLA)	0%	0%
*Includes Inflation at	2.5%	2.5%

For determining the total pension liability and actuarially determined contributions, the post-retirement mortality tables for non-disabled retirees uses the 2006 central rates from the RP-2014 Annuitant Mortality Tables projected to 2018 using the MP-2017 projection scales, and the projected prospectively using the ultimate rates of the scale for all years. The pre-retirement off-duty mortality tables are adjusted to 50% of the RP-2014 mortality tables for active employees. The on-duty mortality rate is 0.00015.

For post-retirement members ages 55 through 64, a blend of the previous tables was used. All tables were projected with Scale BB.

At least every five years the FPPA's Board of Directors, in accordance with best practices, reviews its economic and demographic actuarial assumptions. At its July 2018 meeting, the Board of Directors reviewed and approved recommended changes to the actuarial assumptions. The recommendations were made by the FPPA's actuaries, Gabriel, Roeder, Smith & Co., based upon their analysis of past experience and expectations of the future. The assumption changes were effective for actuarial valuations beginning January 1, 2019. The actuarial assumptions impact actuarial factors for benefit purposes such as purchases of service credit and other benefits where actuarial factors are used.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class.

These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation (assumed at 2.5 percent).

NOTE 7 – <u>STATEWIDE DEFINED BENEFIT PLAN (CONTINUED)</u>

Actuarial Assumptions (continued)

Best estimates of arithmetic real rates of return for each major asset class included in the Fund's target asset allocation as of December 31, 2019 are summarized in the following table:

		Long-Term Expected
Asset Class	Target Allocation	Real Rate of Return
Global Equity	38%	7.00%
Equity Long/Short	8%	6.00%
Private Markets	25%	9.20%
Fixed Income	15%	5.20%
Absolute Return	8%	5.50%
Managed Futures	4%	5.00%
Cash	2%	2.52%
Total	100%	

Discount Rate

The discount rate used to measure the total pension liability was 7.00 percent. The projection of cash flows used to determine the discount rate assumed that contributions from participating employers will be made based on the actuarially determined rates based on the Board's funding policy, which establishes the contractually required rates under Colorado statutes. Based on those assumptions, the SWDB plan fiduciary net position was projected to be available to make all the projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the Net Pension Liability (Asset) to Changes in the Discount Rate

The following presents the Authority's proportionate share of the net pension liability calculated using the discount rate of 7.0%, as well as the Authority's proportionate share of the net pension asset (liability) if it were calculated using a discount rate that is one percentage point lower (6.0%) or one percentage point higher (8.0%) than the current rate, as follows:

	Current								
	1% Decrease	Discount Rate	1% Increase						
	(6.00%)	(7.00%)	(8.00%)						
Proportionate Share of the									
Net Pension Liability (Asset)	\$ 1,728,698	\$ (285,112)	\$ (1,955,302)						

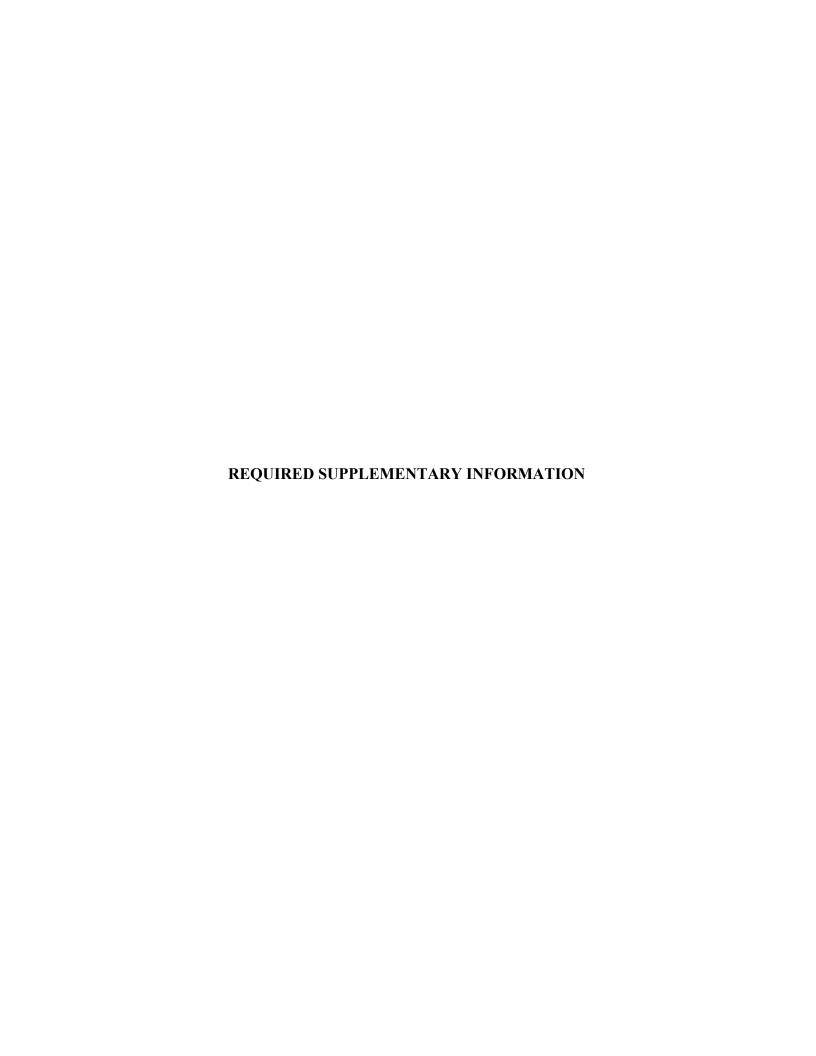

NOTE 7 – <u>STATEWIDE DEFINED BENEFIT PLAN (CONTINUED)</u>

Pension Plan Fiduciary Net Position

Detailed information about the plan's fiduciary net position is available in FPPA's separately issued financial report, which may be obtained at www.fppaco.org.

Subsequent Event

Subsequent to the December 31, 2019 measurement date, House Bill 20-1044 was signed into law on April 1, 2020. Included in the bill is a provision to increase the benefits of the members of the Statewide Defined Benefit Plan through a Rule of 80 provision effective January 1, 2021. This provision provides for a normal retirement as early as age 50 if the member's age combined with years of service totals at least 80. The impact of this change was not included in the Total Pension Liability or the Collective Pension Expense as of the December 31, 2019 measurement period. This will be reflected in the December 31, 2020 measurement period. The impact of the benefit adjustment is approximately \$53 million.
